

noted, although laying submarine cable involves considerable activity over vast distances, the environmental consequences are negligible.¹⁵

GRANT OF THE APPLICATION IS IN THE PUBLIC INTEREST

Authorization for the Applicant to land and operate the FLAG Atlantic-1 cable system in the United States will advance the public interest by fostering the availability of a wide range of cost-efficient, international services in the Atlantic region and offering state-of-the-art capacity beyond that offered by competitive trans-Atlantic cable systems. The self-healing ring configuration of the FLAG Atlantic-1 system will increase the reliability of communications between the United States and Europe. The benefits to carriers and end users from the proposed submarine cable system also include increased capacity, route diversity, and restoration, all of which are critical at this time of rapidly increasing demands for trans-Atlantic telecommunications capacity, due largely to the growth in Internet traffic.

The FLAG Atlantic-1 system will also provide increased competition in the provision of undersea telecommunications capacity in the region. Entry by FLAG Atlantic-1 should have the effect of driving down prices in undersea and

¹⁵ See *National Environmental Policy Act*, 49 F.C.C.2d 1313, 1320 (1974); see also *1998 Biennial Regulatory Review – Review of the International Common Carrier Regulations*, Notice of Proposed Rulemaking, FCC 98-188, para. 32 (rel. July 14, 1998) (Commission tentatively concluding that its environmental rules should be amended to provide that the construction of new submarine cables does not have a significant environmental impact).

backhaul markets. FLAG Atlantic is an independent provider of fiber optic telecommunications systems; the proposed FLAG Atlantic-1 system will *not* be jointly constructed, owned, and operated by a consortium, or "club," of dominant international carriers. Grant of this application for a cable landing license would therefore foster the development of multiple, competing facilities-based trans-Atlantic networks. Such increased facilities-based competition among suppliers of trans-Atlantic fiber optic capacity will result in lower prices and increased technical innovation and service quality. FLAG Atlantic's state-of-the-art system will enable small and medium-sized carriers and Internet service providers in the U.S. to access the European, Middle Eastern, and Asian markets without dependence on the traditional "club" cable systems.

The joint venture parties in FLAG Atlantic have extensive experience operating undersea and other telecommunications cables and facilities. FLAG Holdings owns approximately 66 percent of the equity of FLAG Limited, a Bermuda company, which owns and operates an undersea fiber optic cable system serving Europe, the Middle East, and Asia. The FLAG Limited cable system provides high capacity digital services to international carriers, resellers and Internet service providers. GTS is a leading independent owner and operator of telecommunications companies throughout Europe. GTS affiliates provide cross-border transport of, and facilities-based access for, voice, data, Internet and other telecommunications

services in Europe, as well as high quality telecommunications services in Russia and the Commonwealth of Independent States. Headquartered in McLean, Virginia, GTS's affiliates have offices in London, Brussels, Moscow, Budapest, Kiev, Prague and Paris. In addition, certain affiliates of GTS are authorized to provide services between the United States and international points using their own facilities or by reselling international services of existing facilities-based carriers, pursuant to Section 214 authorization granted by the Commission.¹⁶

Finally, the Applicant's ownership is consistent with the public interest. In its *Foreign Participation Order*,¹⁷ the Commission applied its open-entry policies to cable landing license applications proposing to land and operate submarine cables extending between WTO member countries.¹⁸ In doing so, it adopted a presumption that such foreign participation - even if from non-WTO member

¹⁶ The GTS affiliates who are authorized to provide international telecommunications services pursuant to Section 214 authority issued by the Commission are as follows: Hermes Europe Railtel B.V.; Hermes Europe Railtel (Ireland) Ltd.; Hermes Europe Railtel (Network) Ltd.; MER Network Services B.V.B.A.; and Hermes Europe Railtel (US), Inc.

¹⁷ See *Rules and Policies on Foreign Participation in the U.S. Telecommunications Market, Market Entry and Regulation of Foreign-Affiliated Entities*, Report and Order and Order on Reconsideration, 12 FCC Red 23891 (1997) ("*Foreign Participation Order*").

¹⁸ See *id.* at 23933, para. 93.

countries – is in the public interest and does not pose concerns that would justify denial of a cable landing license.¹⁹

In short, the Commission's policies restricting foreign ownership in submarine cables apply only to undersea cable systems that propose to land in non-WTO member countries. Consequently, because the Applicant here proposes to land and operate a submarine cable between the United States and the United Kingdom and France, each of which is a WTO member country for which the Commission has an open-entry policy, the proposed submarine cable system raises no foreign ownership concerns that would adversely affect the public interest.

Moreover, the Applicant's affiliation with the foreign carriers listed in Exhibit B hereto does not contravene the public interest. Most of these entities operate in WTO member countries. Further, each of these entities are nascent competitors to the traditional monopoly fixed line service operators and lack the ability to discriminate against unaffiliated U.S. carriers through control of bottleneck facilities. Consequently, the proposed FLAG Atlantic-1 cable poses no threat to trans-Atlantic competition.

Accordingly, the Applicant's foreign ownership does not raise any public interest concerns, and the subject application is consistent with previous

¹⁹ See *id.* at 23913, 23933-34, paras. 50, 93; see also *Telefónica Larga Distancia de Puerto Rico, Inc.*, Modification of Cable Landing License, 13 FCC Rcd 9548, 9551, para. 9 (Int'l Bur. 1998).

Commission decisions where grant of a cable landing license was held to be in the public interest.²⁰

[The remainder of this page is intentionally blank; signature pages follow.]

²⁰ See *SSI Atlantic Crossing*, 13 FCC Red at 5964, para. 11 (no foreign ownership concerns raised and no further analysis required where the ultimate parent was a Bermuda corporation, but substantial majority of shareholders are U.S. citizens and companies); *Optel Telecommunications*, SCL-92-004-TC, DA 98-873 (IB, rel. May 8, 1998) (finding sale of shares in company holding cable landing license to Canadian corporation resulting in licensee being 100% Canadian owned raises no issues under Commission's *Foreign Participation Order*, and is in the public interest).

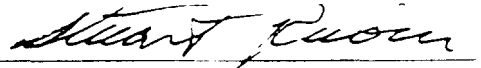

CONCLUSION

For the foregoing reasons, the Applicant respectfully requests, pursuant to 47 U.S.C. §§ 34-39, that a license to land and operate the FLAG Atlantic-I system in the United States be expeditiously granted.

Respectfully submitted,

FLAG Atlantic Limited

Information Submitted Pursuant to Section 63.18(h)(1)

GTS has the following foreign carrier affiliations, as defined by the Commission's rules:

Foreign Carrier	Foreign Country	Principal Business
Hermes Europe Railtel BV	Belgium, Denmark, France, Germany, Italy, Spain, Sweden, Switzerland, The Netherlands, United Kingdom, Luxembourg, and Austria ¹	Carrier's Carrier
GTS-Hungary Telecom Ltd.	Hungary	VSAT Network
Hydrotel Telecommunications Ltd.	Hungary	International and Domestic Data Services
Catalina Sp.z.o.o.	Poland	International Long Distance Data Communications
ATOM S.A.	Poland	International and Domestic Data Services
GTS CzechNet s.r.o.	Czech Republic	International Long Distance
GTS CzechCom s.r.o.	Czech Republic	Data and Internet
Sitel-VSAT s.r.o.	Czech Republic	VSAT Network

¹ Hermes Europe Railtel B.V. is in the process of applying for a license in Austria.

Foreign Carrier	Foreign Country	Principal Business
Dattel a.s. ²	Czech Republic	Domestic Public Voice
SG GTS Romania SRL	Romania	VSAT Network
GTS Monaco Access S.A.M.	Monaco	Carriers' Carrier and International Gateway
EDN Sovintel LLC	Russia	International Long Distance and Local Access
Vostok Mobile, B.V. ³	Russia	Basic Cellular
Prim Telephone	Russia	Basic Cellular
Golden Telecom	Ukraine	Basic Cellular and overlay services
TeleCommunications of Moscow	Russia	Local Access

Dattel a.s. is an unregulated private local network in the Czech Republic which is interconnected to the public switched telephony system in the Czech Republic.

Vostok Mobile, B.V. is a wholly owned subsidiary of GTS. Vostok Mobile, B.V. owns between 50% and 100% of a series of cellular ventures in various regions of Russia. The telecommunications companies in which Vostok Mobile, B.V. has interests are Penza Mobile; Astrakhan Mobile; Votec Mobile; Chuvashia Mobile; Lipetsk Mobile; Arkhangelsk Mobile Networks; Saratov Mobile; Volgograd Mobile; Murmansk Mobile Network; Parma Mobile; Unicel Bryansk; Unicel Kostroma; Unicel Orel; Altaisviaz; Unicel Yaroslavl; BashUnicel; Mar Mobile; Novgorod Telecommunications and Unicel Ivanovo.

Foreign Carrier	Foreign Country	Principal Business

Rathburn Limited ² Abbott Building Main Street P.O. Box 3186 Tortola BVI	32.61%	British Virgin Is- lands	Investment Company

¹ (...continued)
fore have less than a 5% indirect equity interest in the Applicant). BANS also holds a 34.21% equity interest in FLAG Limited, which owns an under-sea fiber optic cable system connecting the U.K. and Japan through several landing points in Europe, the Middle East and Asia. BANS and FLAG Holdings have entered into an agreement pursuant to which BANS will, provided it receives any necessary regulatory approval, including appropriate section 271 authorization (47 U.S.C. § 271) within three years, transfer its 34.21% stock interest in FLAG Limited to FLAG Holdings in exchange for a specified number of shares in FLAG Holdings equal to an additional 32.42 % of the shares of FLAG Holdings (assuming no additional FLAG Holdings shares have been issued before such exchange). If effectuated, this exchange of shares will give BANS a 37.68% direct interest in FLAG Holdings (assuming no additional FLAG Holdings shares have been issued before such exchange). Prior to any such exchange, FLAG Holdings and FLAG Atlantic will not be affiliates (as that term is used in section 271 of the Communications Act) of Bell Atlantic or its operating companies. See 47 U.S.C. §153(1).

² The ultimate parent company of Rathburn Limited is Dallah Al Baraka Holding Company B.E.J.S.C., a Bahraini corporation engaged in various businesses and headquartered in Manama, Bahrain.

<u>Shareholder Name/Address</u>	<u>% Held in FLAG Holdings</u>	<u>Citizenship</u>	<u>Principal Business</u>
